## **SNF Achieves ECOVADIS Platinum Medal for Sustainability Excellence**

**Sept. 13<sup>th</sup>, 2024 - SNF, a global leader in water chemistry, is proud to announce that it has been awarded the prestigious ECOVADIS Platinum medal. This recognition places SNF in the top 1% of companies worldwide regarding sustainability performance.**

The ECOVADIS Platinum medal is the highest accolade given by ECOVADIS, the world's most trusted business sustainability rating platform. It evaluates companies across multiple dimensions, including environmental impact, labor and human rights, ethics, and sustainable procurement.

*"We are extremely honored to receive this Platinum award from ECOVADIS, which highlights SNF's ongoing commitment to sustainability, innovation, and responsible business practices," said Lionel AVOND – Corporate ESG Manager of SNF. "This recognition is a testament to our ACT FOR program, which focuses on three major pillars: promoting responsible chemistry, reimagining low-carbon manufacturing processes, and caring for our people along the entire value chain. By aligning our efforts with these pillars, we ensure that SNF contributes positively to the environment, society, and future generations."*

The ECOVADIS evaluation underscores SNF's key initiatives in areas such as:

- Reducing greenhouse gas emissions through energy-efficient processes.
- Innovating sustainable water treatment solutions that meet the growing global demand for environmental protection.
- Promoting fair labor practices and ethical standards across its value chain.

This achievement is a testament to SNF's continuous efforts to implement sustainable practices within the company and in partnership with its customers, suppliers, and stakeholders.

As SNF continues to advance its sustainability strategy, the company is focused on driving innovation and developing solutions that support the global transition towards a more sustainable future.

### **About SNF**

*SNF is a specialty chemical company and an expert in water chemistry. All our products treat, preserve, and recycle water. We help reduce energy needs and carbon intensity while contributing to the responsible extraction of crucial mineral resources essential to the energy transition.*

*As a global leader in designing and manufacturing water-soluble polymers, SNF continuously improves a range of more than 1,000 products, which helps preserve natural resources, encourages recycling, and improves industrial process efficiencies. In addition, SNF products have several complementary functionalities, making them suitable for many applications, such as solids-liquid separation, viscosity modification, and friction reduction.*
